- **Cloud / Virtualization:** Proxmox & Citrix (Installation of Hyper-visor, VM Creation, Cloning etc.)
- **Web Server:** Apache (Windows & Linux), IIS, Tomcat installation configuration, deployment & maintenance.

WORK EXPERIENCE

Full – Stack Developer	2025 to PRESENT
Mantravat Technology LLP – Hybrid 2025 – Present	
Delivered responsive mobile and web apps integrated with RESTful APIs. Collaborated with UI/UX designers, QA, and backend teams for seamless delivery in Agile environments.	
Key Responsibilities: - Developed cross-platform apps using Flutter & Firebase. - Created React.js components for dynamic web-based dashboards. - Consumed Node.js and Flutter. - Ensured UI/UX consistency using responsive web techniques. - Managed Agile sprints, tasks, and releases using Jira. - Followed version control best practices with Git/GitHub.	

- Completed 3 months internship as **Technology Management** at **InfoNSL Secunet Private Limited**, where I successfully conceptualized, CentOS, Windows Server, Proxmox, XAMPP, Network Administration, ASP.NET, Ubuntu, Kali Linux, Visual Studio, M.V.C. and Network Security.
- **Full - Stack Developer** at **InfoNSL Secunet Private Limited**, where I successfully conceptualized, designed, and implemented an Online Grocery Website(working) HTML, CSS, JavaScript, PHP, Laravel, MySQL and Bootstrap.

PROJECTS

Taurus AI

Taurus AI empowers individuals to take control of their career journey through personalized learning and job-matching features.

- By combining **AI-driven recommendations** with real-time job postings and relevant courses, and leveraging Firebase's robust backend, it helps users stay competitive and aligned with market demands.

School LMS Portal

School LMS is a comprehensive learning management platform developed for a client school to streamline digital education. The system was designed to enable teachers, students, and administrators to interact in a centralized environment for academic delivery, tracking, and communication.

- Developed frontend UI using **js** and responsive HTML/CSS.
- Integrated Firebase Authentication and Firestore for secure login and data handling.
- Built REST APIs with **Node.js** for backend operations like quizzes, results, file uploads.
- Used **Jira** for sprint planning, task tracking, and bug fixes in Agile cycles.
- Coordinated directly with clients for requirement gathering, feedback, and delivery.

Nestern: A nest for Interns

The aim of Nestern is to create a dynamic platform that connects students, interns, and employers to foster professional growth and learning.

- Built using Flutter and Dart for a seamless cross-platform experience and powered by Firebase for robust backend support, Nestern offers a responsive and real-time environment for career development.

Taurus AI

Taurus AI empowers individuals to take control of their career journey through personalized learning and job-matching features.

- By combining **AI-driven recommendations** with real-time job postings and relevant courses, and leveraging Firebase's robust backend, it helps users stay competitive and aligned with market demands.

SBU Alumni Network

The aim of the SBU Alumni Network is to create a platform that fosters strong connections between alumni, current students, and the university.

- It provides an integrated space for alumni to stay engaged with their alma mater, mentor students, and participate in events or initiatives, ultimately strengthening the sense of community and collaboration.

Custom PC Software

I created a web application for people to buy every electronic product related to pc's and they can also create it by themselves.

- The customer can build themselves a pc and can also see it in 3D

ASSESSMENTS / CERTIFICATIONS

- Introduction to Packet Tracer (**CISCO**)
- Python Essentials 1 (**CISCO**)
- Advanced Networking (**CISCO**)
- Build a Computer Vision App with Azure Cognitive Services Using (**Microsoft**)

PERSONAL DETAILS

Languages Known: Hindi, English

Gender: Male
